Tutorial 4b – Floating Point Numbers

- 1) Convert -31.3 to IEEE Single Precision format.

First convert to a binary number $-31.3 = -11111.01001\ 1001\ \underline{1001}$

Next Normalise

$$1.11110\ 1001\ 1001\ 1001\ 1001\ 1001 \times 2^4$$

Significand field is **1111 0100 1100 1100 1100 110** (23 bits with 1. omitted)

Exponent field is $4+127 = 131 = \mathbf{1000\ 0011}$

Number is -ve therefore Sign field is **1**

| Sign | Exponent | Significand |
|------|-----------|------------------------------|
| 1 | 1000 0011 | 1111 0100 1100 1100 1100 110 |

- 2) Convert the IEEE Single Precision format hex value C154 0000 to decimal.

C154 0000 = 1100 0001 0101 0100 0000 0000 0000 0000

| Sign | Exponent | Significand |
|------|-----------|------------------------------|
| 1 | 1000 0010 | 1010 1000 0000 0000 0000 000 |

Exponent field = 1000 0010 = 130 \Rightarrow Exponent = 130 - 127 = 3

Significand field = 10101 Adding Hidden Bit \Rightarrow 1.10101

Therefore number is $1.10101 \times 2^3 = 1101.01 = \text{Decimal } 13.25$

Sign is 1 therefore number is **-13.25**

- 3) Carry out the operation 31.3 + 13.25 in IEEE single precision arithmetic

| Number | Sign | Exponent | Significand |
|--------|------|-----------|------------------------------|
| 31.3 | 0 | 1000 0011 | 1111 0100 1100 1100 1100 110 |
| 13.25 | 0 | 1000 0010 | 1010 1000 0000 0000 0000 000 |

Significand of Larger Number = 1.1111 0100 1100 1100 1100 110
Significand of Smaller Number = 1.0101 0100 0000 0000 0000 000

Exponents differ by 1 place

Significand of Larger Number = 1.1111 0100 0
Significand of Smaller Number = 0.1101 0100 0

Significand of Sum = 10.1100 1000 1100 1100 1100 1100

Sum = $10.1100 1000 1100 1100 1100 1100 \times 2^4$

Normalise $1.01100 1000 1100 1100 1100 1100 \times 2^5$

| Sign | Exponent | Significand |
|------|-----------|------------------------------|
| 0 | 1000 0100 | 0110 0100 0110 0110 0110 011 |

4)

| Bits | Binary value or special value | Decimal value or special value |
|---------|----------------------------------|-----------------------------------|
| 0 00 00 | 0 | 0 |
| 0 00 01 | 0.01 | 0.25 |
| 0 00 10 | 0.10 | 0.50 |
| 0 00 11 | 0.11 | 0.75 |
| 0 01 00 | 1.00 | 1 |
| 0 01 01 | 1.01 | 1.25 |
| 0 01 10 | 1.10 | 1.5 |
| 0 01 11 | 1.11 | 1.75 |
| 0 10 00 | 10.0 | 2 |
| 0 10 01 | 10.1 | 2.5 |
| 0 10 10 | 11.0 | 3 |
| 0 10 11 | 11.1 | 3.5 |
| 0 11 00 | ∞ | ∞ |
| 0 11 01 | NaN | NaN |
| 0 11 10 | NaN | NaN |
| 0 11 11 | NaN | NaN |
